The ELOS™ Technology
Electro Optical Synergy

After a hard winter, your skin may be suffering from dryness, redness, age spots, looseness, spider veins or even premature skin aging. Photorejuvenation treatments are a proven effective treatment against many of these conditions. After 3 to 5 treatments, you will notice an improvement in your skin tone, softness, less redness and aging. Photorejuvenation treatments are also beneficial for your hands, neck or even other areas! Each treatment takes approximately 1 hour on

average and preferably twice per month to achieve desired results.

Permalaser is proud to offer **elōs™**, the first and only technology that uses combined energies to effectively and gently reduce the appearance of problem veins on the legs and face. **elōs™** is truly the next generation of safe and effective vein treatment technology. Powered by **elōs™** technology, Syneron skin rejuvenation system delivers.

50% de Rabais sur Photorajeunissement

Après un hiver dur, votre peau peut souffrir de la sécheresse, de la rougeur, des taches d'âge, du relâchement, des veines d'araignée ou même du vieillissement prématuré de peau.

Les traitements de Photorejuvenation sont des traitements efficaces prouvés contre plusieurs de ces conditions.

Après 3 à 5 traitements, vous noterez une amélioration de votre

tonalité de peau, de douceur, de moins de rougeur et de vieillissement.

Permalaser est fière d'offrir **elōs™**, la première et seule technologie qui emploie des énergies combinées efficacement et doucement pour réduire l'aspect des varices capricieuses sur les jambes et le visage.

elōs™ est vraiment la prochaine génération d'une technologie sûre et efficace pour le traitement des veines. Actionné par

technologie **elōs™**, ce système par la compagnie Syneron pour le rajeunissement de peau, livre.

HAIR REMOVAL AT PERMALASER

The only one of its kind Candela's unique, Patented Dynamic Cooling Device (DCD) is integrated with all GentleLASE lasers. DCD reduces pain and maximizes patient protection by delivering a short, targeted burst of non-toxic cryogen onto the top layers of the skin milliseconds before the laser pulse. This evaporative coolant speeds up treatment, without affecting the underlying targeted hair follicles and blood vessels or impeding your visibility.
