“Permalaser is dedicated to enhancing our clients’ sense of well-being”

“Let Permalaser become your partner in skin preparation for your surgery!”

Results for a facelift or laser resurfacing surgery vary greatly from patient to patient. Preparation is the key for a successful result. For example, you bring your car to the car dealer for a tune up. You have the oil changed, batteries replaced, belt inspected and tires rotated. Why not take the same care of your skin *before undergoing a surgical procedure?*

A series of photofacials using the advanced ELOS technology will remove unwanted blemishes, even the skin tone and tighten the skin. Combine this treatment with our famous Beverly Hill Peel and you are already on your way to a fresh new look!

A facelift procedure doesn’t make all the imperfections disappear. That

Please see *Contemplating a Facelift or Laser Resurfacing Surgery?* on page 2

Dry and Flaky Skin?

“It’s a fact! Our skin takes a beating in the Winter!” *Hot showers, heating, cold air, snow and fluctuating temperatures all have an undesirable effect on our skin!*

Moisturizing is the Key! A good moisturizer can help your facial skin (and other body areas) keep its moisture balance. Knowledge of your skin type will prove beneficial in the selection of your moisturizer! Toning your skin to keep its pH balance is equally important. Don’t ignore the signs of dry flaky skin!

Beneficial at this time of year is exfoliation! At home use of a gentle exfoliating cream or gel on a weekly basis is of the utmost importance. Exfoliating assists your moisturizer in penetrating into deeper dermal layers, thus giving you smooth, silky skin! Mechanical exfoliating is also recommended for more troublesome cases. Microdermabrasion or chemical peels are all the rage at this time of year for the face, neck, chest, hands and arms! They also assist in better skin tone, elasticity and a reduction in blemishes! ***It’s time to get healthy! Do the same for your skin!***

VALENTINE GIFT CERTIFICATES AVAILABLE
