ANTI-AGING SECRETS!

PERMALASER's Top 6 Anti-Aging Secrets!

The secret to beautiful skin! We talked about this in 2009 and it's important.

KNOW YOUR SKIN! Not certain if you have combination, oil, dry or normal skin? The trick to finding the right skin care products to be at their most effective for your skin is to know what your skin needs.

Understanding your unique skin type is important to finding the right products and meeting your skin's needs. Visit us and we will help you assess your skin type.

The right Cleanser is important. CLEANSE YOUR SKIN EVERY DAY! The recommended routine is to wash your face every morning and night to remove pollutants and oils off your skin.
A gentle foaming cleanser which is appropriate for your skin type should be used daily, and don't forget the neck!

Avoid using regular soap as this causes your skin to dry out.

Moisturize. HYDRATING IS IMPORTANT! After cleansing your skin the application of a moisturizer specific to your skin type is recommended for daily use. We recommended an SPF based moisturizer, even on overcast days!

Don't forget your elbows, knees, legs and arms! They also need some T.L.C.! As you moisturize take a few extra minute to examine your body for unusual pigmentation or moles; see anything unusual? Consult your dermatologist.

What would you give to have smooth silky skin?

SPOIL YOUR SKIN! Facial masks, a customized peel and/or a Microdermabrasion treatment is very beneficial to your skin! Each treatment can improve your skin's condition and leave you with glowing skin!

Suffer from Acne? **PLEASE, AVOID HANDS ON FACE.** It may be tempting and easy to pick and pop, but this only causes more long term damage to your skin such as infections and

scarring. At Permalaser we have affordable and effective products to help your skin. Let them do the work for you!

Sunscreen! If you can't avoid the sun, take preventative measures. At Permalaser we cannot stress this enough. Sun damage is the fastest way to older, less glowing skin.

Daily usage of an SPF 15 (SPF 30 or higher if you are sun sensitive or are taking photosensitizing

medication) is highly recommended to maintain glowing skin and avoiding sun damage, sun spots, blemishes and more! SPF based moisturizers are available. And remember....**REPEAT APPLICATIONS!**

Permalaser specializes in skin treatments and skin care. Suffering from Rosacea, Acne, Age Spots, Blemishes, Sun Spots, Spider Veins and more? Ask us for a **FREE** consultation. We look forward to meeting you!

PHOTOREJUVENATION...*Spider Veins & Age Spots*

Fed up with seeing those fine spider veins and age spots all summer long? If your tan is beginning to fade you can start your treatments this month! Yes, it is possible!

Permalaser is proud to offer Elōs™ the first and only technology that uses combined energies to effectively and gently reduce the appearance of problem veins on the legs and face. Elōs™ is truly the next generation of safe

and effective vein treatment technology. Powered by Elōs™ technology, Syneron skin rejuvenation system delivers!

Benefits of Elōs™ treatments can also help if your skin is suffering from dryness, redness, looseness or even premature skin aging. A proven effective treatment against many of these conditions, after 3 to 5 treatments, you will notice

an improvement in your skin tone, softness, less redness and aging.

Each treatment takes approximately 1 hour on average and preferably twice per month to achieve desired results.

Free consultations are offered by Permalaser. Schedule yours today!

ÉPILATION AU LASER AVEC GENTLELASE !

L'épilation au laser chez Permalaser consiste à supprimer les poils du corps d'un homme ou d'une femme, tel que le visage, jambes, bras, ou d'une partie moins exposée, comme le pubis, dos, poitrine, lèvre supérieure, la barbe de l'homme et plus encore!

En plus des vertus de confort l'épilation masculine est de plus en

plus en demande! L'épilation de la barbe, les poils de nez, les oreilles, le dos et les épaules sont souvent visés.

Chez les femmes, les changements hormonaux, comme la ménopause, peuvent accentuer les poils sur le menton, les joues et la lèvre supérieure. L'épilation des jambes, des aisselles, et l'épilation du pubis est une question esthétique

Chez Permalaser nous utilisons le système GentleLase Plus de Candela avec le système de refroidissement dynamique intégré à tous les lasers GentleLASE. Unique dans son genre, les traitements sont efficaces et sans douleur.

Le système DCD permet de diminuer le malaise chez le patient et lui assure une protection en

POUR HOMMES ET FEMMES!

émettant un bref jet de cryogène non toxique qui se dépose sur la peau quelques millisecondes avant l'impulsion laser. Ce spray rafraîchissant accélère le traitement, sans affecter les couches sous-jacentes des follicules pileux et les vaisseaux

sanguins ni troubler la vision du patient.

Grâce au système DCD, la plupart des patients ne ressentiront pas le besoin d'utiliser des gels refroidissants ni d'avoir recours à des anesthésies coûteuses. Le temps de

traitement s'en trouve agréablement réduit et la guérison est plus rapide.

Autant en demande par les hommes que les femmes! Essayez-nous aujourd'hui!

There is less recovery
time than traditional vacuum

*Benefits of
Microdermabrasion:*

Better skin tone
Even skin color
Refined skin pores
Fewer Acne breakouts
Tighter more youthful
skin
Softer skin
Younger appearance
Renewed elasticity
Boost the Natural
Production Of Collagen

VELASHAPE ! As seen on The Doctor's.

The Permalaser Clinic now
proudly offers the new
and improved VelaShape;
the first and only FDA and
Health Canada approved
medical device that
penetrates deep enough
into the skin to effectively
treat cellulite and contour
the body. This treatment
is painless, non-invasive
and requires absolutely
no down time.

This cutting edge

technology uses infrared
light and radio waves
along with tissue
mobilization. The radio
waves increase
intracellular oxygen
diffusion by heating the
deep adipose tissue. The
infrared light increases
the elasticity of the skin
and heats subcutaneous
fat while protecting the
skin. Vacuum
manipulation smoothes
out the skin to facilitate
the transfer of light and

radio-frequency energy.

The synergy of these
three components makes
the VelaShape device a
more effective and long-
lasting solution for
cellulite.

Individual results and it is
not recommended for
everyone. Please request
a hassle free consultation
today or visit
www.permalaser.com.

The JESSNER PEEL! For all skin types!

*Enjoy the benefits of
beautiful skin!*

Benefits of the *Jessner Peel*
include treatment for clogged
pores, acne scarring, skin
discoloration, thickened,
aging skin, moderate
wrinkling and
environmentally damaged

skin. Also beneficial for
people with severe acne,
oily or thick skin because it
tends to decrease oil
production and opens
clogged sebaceous glands.

Unlike some chemical peels,
the *Jessner Peel* penetrates
more deeply into the

epidermal layers of the skin
and results in greater
exfoliation of the outer skin
layers. Several treatments are
required to achieve optimal
results due to the gentleness
of this peel.

For more information on the
Jessner Peel, please ask for a free
consultation.
