On special this month for **only \$75.00** (regular \$140)

Remove brown spots and dead skin before the holidays! Refreshes skin tone and reduces acne scarring !

LIPS READY FOR THE HOLIDAY SEASON?

***PUMP THEM UP* at Permalaser *before* the Holiday Season!**

We all desire luscious lips! And why not? No creases, no lipstick leaking, just perfect, absolutely kissable lips! The trick is to make it happen *before* the holiday season. Depending on the product you wish to use, you *might* need a touch up before you reach perfection, therefore Permalaser is here to help! FREE, yes FREE consultations are available with a board certified plastic surgeon. All you pay for is the product you choose depending on the results you desire. ***Now what are you waiting for?***

Now, let's discuss options. Restylane, Perlane, Juvéderm, ArteSense, Collagen.....much to choose from and each one has their own benefits and a specific duration period.

During your consultation with the board certified plastic surgeon, it is important to discuss your desired results, your budget and any allergies or medical conditions you may have (it is important for your doctor to have *all* the facts). ***Please note that should you have a history of cold sores, it is important not to schedule an injection appointment during the active phase of the cold sore.*** The doctor may provide you with a prescription to take *prior* your injection to avoid another breakout after the injection. Now, taking all this information into consideration your doctor will then provide you the best product that he/she believes will achieve your desired results.

Drop by at our offices, call or email us for additional information on a specific product. It will be our pleasure to discuss these options in more detail with you.

Are you ready for a change?

Call us today or drop by for a **Free Consultation**. Simply take a moment to schedule your appointment **by calling 514-731-1545** or by email at info@permalaser.com!

We're on the Web!
www.permalaser.com

We at Permalaser do the extras that other clinics do not. Our post-treatment care is unparalleled. We are constantly keeping abreast of developments in the Laser hair removal field. We believe that we offer the best laser treatments possible and offer quality treatments at a fair price where your safety is never compromised. Trust us with all your hair removal goals.

Removing unwanted hair this fall with the power of GentleLase Plus!

How does the GentleLASE work? A laser produces a beam of highly concentrated light. Different types of lasers produce different colors of light. The light emitted by the **GentleLASE** is absorbed by the pigment (melanin) located in hair follicles (melanin pigments give hair its color) and hair shaft. The laser pulses for a fraction of a second, just long enough to vaporize the pigment - disabling several hair follicles at a time to eliminate or significantly impede the hair's regrowth - but not long enough to damage the surrounding skin. The **GentleLASE's** special contact-cooling hand piece further protects the epidermis (upper layer of skin). This patented method of epidermal preservation allows delivery of more laser energy deeper into the hair follicle.

Additionally, the **GentleLASE** is able to treat a broader range of skin types than most other hair-removal lasers. It is delicate enough for a woman's fine, sensitive skin and robust enough for a man's beard, back, or arms. The **GentleLASE** effectively removes unwanted body hair. Traditional techniques such as shaving, plucking and waxing, provide only temporary relief and may actually stimulate hair growth. Electrolysis, while effective, often requires years of ongoing and frequently painful treatments. All of these methods commonly result in scarring, allergic reactions, and ingrown hairs. Laser hair removal works by targeting the pigment inside the hair follicle without damaging delicate pores and structures of the skin. Because hair cycles through "growth" and "dormant" phases, and because during the "dormant" phase the follicle has no pigment, at least 3 to 4 treatments will be needed.

How many sessions are needed? The number of sessions will vary for each individual. During the initial visit, the laser light disables those follicles in the "active" phase of the growth cycle. Follicles in the "dormant" phase will not be affected. Since follicles cycle through "active" and "dormant" phases, additional sessions may be desired once the "dormant" follicles become "active". For this reason, we recommend a series of three treatments with a fourth treatment if needed.

Photorejuvenation = The Power to Renew Yourself!

Beautiful skin at the speed of light™, a non-surgical and non-invasive skin enhancement.

FotoFacial RF™ are full face, neck, hands or body treatments using Intense Pulsed Light and Radio frequency energy combined in the same pulse. These gentle, no downtime treatments are used to improve the cosmetic appearance of the face, neck or body.

FotoFacial RF™ treatments are beneficial in the treatment of rosacea, flushing, redness, ruddy complexion, broken capillaries, spider veins of the face, sun spots, age spots, hyperpigmentation, melasma, chloasma, mask of pregnancy, freckles, wrinkles and skin laxity. The combination of Intense Pulsed Light and powerful Radiofrequency energy produces improvements of 50 to 70%. The synergy of electrical (RF) and optical (light) energies are applied to the blemished area. Gradually and gently, the blemishes will lessen or be eliminated. At the same time, significant amounts of collagen, elastin and ground substances in the dermis will be produced, resulting in a noticeable and significant smoothing of fine to moderate wrinkles and textural irregularities of the skin.

Curious? Well you can find out more by requesting a FREE PERSONALIZED ASSESSMENT only at PERMALASER. Call today! Or visit our website for additional information.
