Beautiful YOU with Restylane!

Maybe you've never considered facial rejuvenation. Or maybe you've put it off until the right time. *Maybe that time is now.*

Restylane offers a safe alternative from the traditional surgical interventions. Quick and with immediate results, Restylane adds volume to your face and this helps in giving you a more *youthful appearance* without surgery.

Restylane is made from *hyaluronic acid* which is naturally found in the human skin. It helps attract and bind water molecules to help maintain volume. As we age, we lose some of this volume, which is why Restylane is the *natural choice for facial rejuvenation.*

Injected by a licensed physician the duration of the treatment and the quantity of the syringes used depends completely on the results you wish to achieve. You may wish to fill in an acne

spot or give a touch of volume to your lips, or get rid of those nasolabial folds (lines that run from the side of your nose to the corner of your mouth). Maybe even augment your cheeks! *Therefore it is important to discuss your wishes with the physician and let him know of any medical conditions.*

PERMALASER offers FREE consultations with a Board Certified Plastic Surgeon to their clients. *Call us today and schedule an appointment for the next availability!*

can do for
you!**

BOTOX...Frown Lines No More!

Frown lines, crow's feet, forehead lines and that wrinkle between your eyebrows (called the glabella) are all caused by the constant movement underneath your skin. Just that permanent frown may cause people to think that you are constantly frustrated or mad. *Has anyone asked you that question before?*

Well let me share the good news. A Botox injection diminishes these lines and

wrinkles by relaxing the muscles which cause the wrinkles!

Botox is a SAFE treatment when performed by a licensed physician. Made from the Botulinum toxin type A, it is purified into a protein that blocks the release of acetylcholine. Botox typically lasts for a few months; therefore if you are planning an injection before a big event it is always best to do it a month before to

achieve the optimal results. If you are taking vitamin E or Ginkgo Biloba, we do advise to stop taking them for at least a week or two prior to the treatment to reduce the risks of bruising.

Botox takes several days to take full effect, so don't worry if you don't see results immediately after the injection. Over a period of 2 to 4 days you will feel the product take effect, resulting in a smoother more relaxed look.

FotoFacial RF Facial Rejuvenation at Permalaser.

Let's face it, we all want beautiful skin.

As we age our skin is affected by every day life and every day pollutants. Stress, work and loss of collagen causes us to develop fine lines, uneven pigmentation (mostly brown or red) and our skin can also look dull and tired.

GOOD NEWS! Photorejuvenation can help your skin look radiant again!

That is why at PERMALASER we offer only the best light based system "FotoFacial RF Facial Rejuvenation" since your safety and satisfaction is our #1 priority.

Targeting the facial area, arms, hands and chest to remove blemishes, fine lines and wrinkles, skin discoloration, and remove age and sun spots.

A series of procedures can

be scheduled to achieve optimal results or to maintain your current results. Some patients notice a considerable improvement after 2-3 procedures; and yes, even after 1 treatment, your skin is already starting to show results.

To learn more about FotoFacial RF Facial Rejuvenation call us today at 514.731.1545 or visit our website at www.permalaser.com

Free consultations are offered by Permalaser, every day!

Treating Hyperhidrosis with Botox!

Sweating is a natural function of the body needed to regulate temperature and the secretion of sweat is controlled by the nervous system. Throughout an

average day, our bodies naturally perspire as a way to regulate heat. . In some individuals, natural perspiration is excessive, the eccrine glands are over-stimulated and. sweat is produced beyond what is necessary to cool the human body; this

condition is referred to as primary hyperhidrosis (secondary hyperhidrosis involves the entire human body).

PERMALASER offers FREE consultations with a Board Certified Plastic Surgeon to their clients. Call us today and schedule an appointment for the next availability!
