"At Permalaser, we offer the best skin care and treatments possible for our clientele.

Free, no obligation skin consultations are available daily with our knowledgeable staff.

Plan ahead for the winter; *now* is the time to start your new skin care regimen to be the best you can be for the coming months ahead, especially the holiday festive season!"

Come
experience
what we
can do for
you!

Tired of fine lines, wrinkles, persistent red complexion, sun spots, acne scars, large pores and other blemishes? *Why not try something that has been proven over and over again to successfully treat all these conditions?* IPL Photorejuvenation is such an advanced treatment that we treat areas such as the complete facial area, neck, hands and other areas using Intense Pulsed Light and Radio frequency energy combined in the

same pulse. These gentle, no downtime treatments are used to improve the cosmetic appearance of your skin

FotoFacial RF™ treatments are beneficial in the treatment of rosacea, flushing, redness, ruddy complexion, broken capillaries, spider veins of the face, sun spots, age spots, hyperpigmentation, melasma and cholasma, mask of pregnancy, freckles, wrinkles and skin

laxity. The combination of Intense Pulsed Light and powerful RadioFrequency energy produces improvements of 50 to 70%.

Yes, several treatments are required to receive the full benefit of the treatment

However the effects *will surprise you!*

Free consultations are offered by Permalaser.
Schedule yours today!

There are many lasers and devices on the market that claim to deliver state-of-art photorejuvenation and you will notice a degree of improvement. However, there is nothing on the market today that can compete with the FotoFacial RF™.

The combination of the Intense Pulsed Light and RadioFrequency provide the optimal degree of enhancement to all components of your skin.

The synergy of electrical (RF) and optical (light) energies are applied to your skin. You will feel a *cooling sensation* on your skin. Gently, painlessly and with every treatment, blemishes will lessen or be eliminated.

In addition, benefits are apparent as we stimulate the collagen which will result in noticeably smoothing of fine to moderate wrinkles and textural irregularities of the skin. *Now that is beneficial!*

This treatment is not available to the patients that currently take light sensitizing medications or are light sensitive. Patients with pacemakers are also excluded from receiving this treatment.

However because we care deeply for your skin as much as you do, we will be happy to meet with you to suggest alternate methods of treatment which will still be beneficial to you and your skin.

MICRODERMABRASION treatment – *One Free with every purchase of an IPL Photofacial*

WHAT IS MICRODERMASION?

Simply put? It's a *beneficial add-on to your IPL Photofacial treatment!*

At Permalaser Clinic we perform a technique called Macrodermabrasion which uses non-toxic water soluble salt crystals which penetrates

deeper for outstanding results with fewer passes. Using positive pressure to eliminate bruising associated with traditional vacuum based Microdermabrasion systems.

Using a precision hand piece that directs a stream of very fine, chemically inert crystals and mild suction where needed on the skin, the gently

abrasive action exfoliates the outermost layers of the skin. Macrodermabrasion might be compared to results similar to those of glycolic acid peels. A full-face treatment generally takes 20 to 40 minutes. ***Why wait any longer? Come and visit PERMALASER today!***
