We are constantly keeping abreast of developments in the Laser hair removal field. We believe that we offer the best laser treatments possible.

We offer quality treatments at a fair price where your safety is never compromised.

Come and see what we can do for you! 514-731-1545

### CELLULITE AND BODY SCULPTING WITH VelaShape™ as seen on THE DOCTOR'S

The Permalaser Clinic now proudly offers the new and improved VelaShape;

<http://www.youtube.com/watch?v=c3fmd4v8Cms>

the first and only FDA and Health Canada approved medical device that penetrates deep enough

into the skin to effectively treat cellulite and contour the body. This treatment is painless, non-invasive and requires absolutely no down time.

This cutting edge technology uses infrared light and radio waves along with tissue mobilization. The radio waves increase intracellular oxygen diffusion by heating the deep adipose tissue. The infrared light increases the elasticity of the skin and heats subcutaneous fat while protecting the skin.

Vacuum manipulation smoothes out the skin to facilitate the transfer of light and radio-frequency energy. The synergy of these three components makes the VelaShape device a more effective and long-lasting solution for cellulite.

Individual results and it is not recommended for everyone. Please request a hassle free consultation today or visit [www.permalaser.com](http://www.permalaser.com).

"At Permalaser, we offer the best skin care and treatments possible for our clientele.

Free, no obligation skin consultations are available daily with our knowledgeable staff.

Plan ahead for the summer; *now* is the time to start your new skin care regimen to be the best you can be!

Venez voir  
ce que  
nous  
pouvons  
faire pour  
vous!

Clean your skin with a cleanser recommended for your skin type *every morning*.

Apply a toner to balance skin tone (for specific skin types). Our Refreshing Toner (Alcohol-Free) is an essential part of your daily vitamin-C skincare regime. This unique, gentle, alcohol-free formulation is enriched with Vitamin-C IDS™, essential minerals and botanical extracts to provide clean, refreshing toning without the harsh, drying effects of alcohol.

Follow with a lightweight SPF moisturizer on your face and neck. We do recommend one that is enhanced with SPF rather than a sunscreen to prevent adding more oil to your skin and to protect skin against visible signs of aging and against UV radiation.

Planning to be out in the sun for prolonged periods of time? We recommend application of an SPF 15 (if you are already susceptible to sunburns, or are taking photosensitive medication it is wise to use a higher SPF).

Repeated applications to the arms, legs, chest, ears, facial area and back (shoulders) are highly recommended. Prevent burns! Prevent skin aging!

Another trick to beautiful glowing skin is to drink water; in the summer months your body loses hydration faster. This preventative measure prevents sun stroke and fatigue and guarantees glowing healthy skin!

## Other Great Products to Add to Your Skin Care Regimen

For our patients who suffer from redness, we offer a great package of 6 products for Redness Relief! *Why suffer any longer? You can have great skin too!*

Another great product to add to your skin care regimen would be the Kine-C Dual Action Skin Firming Serum works as an advanced hydration program against aging. (not necessary, but a nice add-on to your daily skin care regimen!)

A facial scrub gel or cream based facial scrub to remove the dead skin cells, oil dirt and other impurities that can lead to blackheads and blemishes without damaging your skin. Following the recommended use is highly suggested to keep your skin glowing all summer long!

Vitamin-C IDS™ acts on the surface of the skin as an anti-aging factor by neutralizing free radicals produced in the skin. Vitamin-C also stimulates collagen formation topically and

increases skin vitality and youthfulness. Vitamin-C IDS™ (L-Ascorbic Acid) acts quickly by being absorbed topically into the skin and deposited in the spaces between cells where its action is optimal and controlled. Use Vitamin-C IDS™ High Potency Serum 10 on cheeks, chin, forehead, neck and décolleté area as desired.

*Ask our staff for a private consultation on your skin care regimen!*

## Arrêtez de froncer avec le traitement des rides par la toxine BOTOX, type A

La contraction des muscles du visage crée les mimiques du visage mais provoque à terme des rides d'expression.

Les meilleures indications du traitement par le Botox sont les rides du lion (rides

du froncement, rides verticales, inter-sourcilières ou glabellaires) situées entre les deux yeux, les rides du front et celles de la patte d'oie, au coin des yeux.

D'autres rides et plis

disgracieux sont parfois traités au niveau du nez, du menton ou du cou.

Le muscle affaibli et relaxé par le Botox ne se contracte plus, arrêtant ainsi l'évolution des rides d'expression.

## **Botox (suite)**

Une technique d'injection appropriée par un chirurgien plasticien certifié permet de conserver un visage expressif.

Le Botox est une poudre blanche que le médecin prépare en y ajoutant une quantité variable de sérum physiologique stérile (eau). Le liquide est injecté, en très petites quantités avec une aiguille très fine dans la région des rides et les

injections sont à peine douloureuses.

Les effets du traitement commencent à apparaître dans les 24 à 48 heures qui suivent les injections, l'effet maximum est obtenu après 1 à 4 semaines et dure trois à six mois suivant les patients.

L'intervalle entre les traitements est en général de trois à six mois,

variable entre chaque patient.

Alors pourquoi passer l'été à froncer ? Évitez les ridules avec Botox !

Chez Permalaser, nos consultations sont gratuites avec un chirurgien plasticien certifié !

## **JUVÉDERM, lèvres pulpeuses et sensuelles! Luscious and full lips with JUVÉDERM**

Juvéderm® agit de différentes façons pour vous procurer le résultat naturel et sensuelle en moindre d'une visite. Le remodelage de vos lèvres inférieures et supérieures avec Juvéderm® rend vos lèvres naturellement pulpeuses et équilibrées. Cette amélioration est celle que les femmes recherchent le plus.
